(57) Abstract: The present invention relates to compositions and methods of use, wherein the composition comprises a conjugate of a bacterial superantigen and an antibody moiety. More particularly, the bacterial superantigen has been modified to decrease seroreactivity with retained superantigen activity.

1. The first part of the document is a title page. It contains the title of the document, the author's name, and the date of the document.

2. The second part of the document is an abstract. It provides a brief summary of the main points of the document.

3. The third part of the document is an introduction. It provides a more detailed overview of the document's content.

4. The fourth part of the document is the main body. It contains the main text of the document, which is divided into several sections.

5. The fifth part of the document is a conclusion. It summarizes the main findings of the document.

6. The sixth part of the document is a bibliography. It lists the sources used in the document.

7. The seventh part of the document is an appendix. It contains additional information that is not included in the main body of the document.

8. The eighth part of the document is a glossary. It defines the terms used in the document.

9. The ninth part of the document is an index. It provides a list of the topics covered in the document.

10. The tenth part of the document is a list of figures. It provides a list of the figures included in the document.
